INSTALLATION
Rivet or weld adjoining frames together

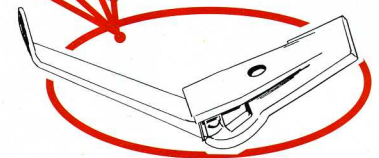

Simple installation of a straight bank of frames forming a partition across the air intake duct

3 STANDARD DEPTHS - 2", 3", & 4"

Optional "P" CLIPS
Available in place of tite latch, must specify when ordering.

Up to (4) TITE LATCHES Hold the filter in place. Optional- Not included; must be specified with your order.

FINISHES AVAILABLE: ALUMINIZED • GALVANIZED • STAINLESS STEEL

FEATURES AND SPECIFICATIONS - 3401 FRAMES

- **STANDARD SIZES** - Filter holding frames are available in standard size depths of 2", 3", and 4". (See standard sizes shown on reverse side)
- **CUSTOM SIZES and DEPTH FRAMES** are also available to give versatility - for example, a 3" depth frame may be used to hold a 2" depth pleat and a 1" bag-type filter.
- **NEOPRENE FOAM GASKETS** - Around entire perimeter of each frame assure an airtight seal between filter and frame. (Must be specified with order)
- **EASY INSTALLATION:** Aircon unit frames are easily assembled into a filter bank of a required capacity by riveting or welding adjoining frames together. (See illustration at left.)
- **TITE LATCHES** clamp against filters to hold filter firmly in place (must be specified with your order). "P" clips are also available in place of tite latches - must also be specified with order.
- **CONSTRUCTION:** 16 gauge metal assures rigid assembly for multiple welding or riveting of adjoining frames. Frames have welded seams, and are available galvanized, aluminized, or in stainless steel.

CUSTOM SIZES: ANY DEPTH OR FRAME SIZE IS AVAILABLE!
