

# Some building visitors sneak inside unseen

(They slip right in through your HVAC airstream)

Dirt and debris on the HVAC coils

Fiberglass HVAC insulation particles in the airstream

Dirt and biological fouling in the HVAC condensate pan

Particulates in your building airstream can cause all sorts of problems. We have advanced products to help remedy the situation.

## Powder Kegs COIL CLEANER

- Non-acid cleaner in powder form
- No lugging or shipping all that water!

## Fast Attack COIL SANITIZER

- Made with iodine widely used in hospitals.
- Bactericidal. Fungicidal. Germicidal.

## First Strike MicroCoat COIL SHIELD

- Revolutionary molecular coat for coils makes the dirt wash off into the drain.
- Cuts down coil cleaning up to 8 times.
- Apply once every 1-3 years.

## Flex Seal FLEXIBLE COATING

- Coats fiberglass insulation.
- Resists mold and fungus and reduces odors from microorganisms.
- Flexible so won't crack.

## PanGuard CONDENSATE PAN CLEANER

- Cleans the pan corner-to-corner.
- Time-released cleaner works while you're not.
- Replace once every 3 months for round-the-clock cleaning.

## Algae Guard CONDENSATE PAN MICROBICIDE

- Effectively acts on fungi, mildew, slime, bacteria, algae and their odors.
- Controlled-release biocide works continuously 24/7.
