

Spray Booth Accessories & Maintenance Products

Air Flow Technology's complete line of spray booth maintenance and safety products provides our customers with a single source supplier for each segment of their finishing operation. From protective coatings to replacement hardware, AFT has every accessory for your spray booth.

STRIPPABLE AND WASHABLE SPRAY BOOTH COATINGS

AFT's complete line of washable and strippable coatings provide an economic alternative to labor intensive spray booth scraping and cleaning. Our premier line of water-based coatings are easily applied to walls, windows, and lights using standard conventional, HVLP, or airless spray equipment. At the end of their service life, simply peel (*strippable coatings*) or rinse (*washable coatings*) the film away. Washable and strippable coatings are an easy way to keep your spray booth free from the dangerous accumulation of combustible paints and coatings.

- Non-hazardous, low VOC formulas
- Easy and safe to ship, store, apply, and dispose
- For all dry filter & water-wash spray booths
- Bright white or clear formulas available
- Available in standard or high temperature formulas for wide range of applications

SPRAY BOOTH FLOOR & SURFACE PROTECTION

Every spray booth is different and AFT has floor and surface protection for each application. Each of AFT's unique floor coverings is safe, economical, and easy-to-use. Flame retardant white and kraft coverings are suitable for most spray operations with moderate to heavy foot and machinery traffic. For applications with intense machine traffic or a need for complete barrier protection, AFT's High Strength Floor Covering is recommended. Light spray areas with minimal maintenance requirements may choose our un-treated economy kraft paper. All products are suitable for floors and mixing rooms, and are available in a wide range of sizes.

- Available in 70 lb., 80 lb., 100 lb. and High Strength styles
- FRP products comply with ASTM Standards D777-71 & D4433-84
- Bright white and kraft varieties available

PROTECTIVE FILM FOR WINDOWS & LIGHTS

AFT's 12" & 18" clear films are ideal for finishing operations where windows and lights must remain clean and translucent. This heavy duty product will adhere to most spray booth windows and lights and will assist in making spray booth clean-up easy and economical. Designed for standard and bake-style spray booths, the film will adhere to the surface for 12-months and peel-away cleanly at the end of its service life without leaving residue.

- Convenient 12" & 18" widths
- Designed for conventional and bake-style spray booths
- Long lasting protection for windows & lights

Spray Booth Accessories & Maintenance Products

AFT PAINTSAFE™

Air Flow Technology proudly offers PaintSafe™, a liquid chemical used to eliminate common concerns in the painting industry of spontaneous combustion and/or landfill leaching. Once applied to paint-laden spray booth filters, Paint-Safe™ encapsulates solvent-borne coatings to eliminate spontaneous combustion as well as the possibility of post disposal leaching.

- Improves spray booth safety
- Reduce hazardous waste disposal concerns and costs by 50+%
- Eliminates spontaneous combustion challenges
- Neutralize waste-water in water-wash applications
- Concentrated formula available in 1, 5, and 55-gallon containers

Q-LOCK™ TRACK SYSTEM

The Q-Lock Track System is a rigid vinyl track which is easily installed along the top, bottom and sides of the paint spray booth exhaust wall. Blanket media is inserted into a slot in the track with a straight edge blade or roller to create a tight perimeter seal. At the end of the filter's service life, the blanket is easily removed by quickly pulling the filter out along its track. Q-Lock reduces filter installation labor and paint by-pass caused by sagging filter pads.

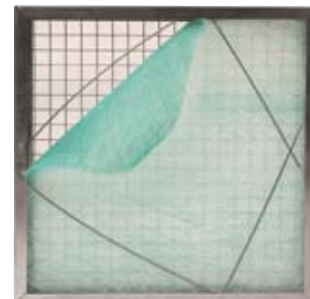

- Chemical resistant, rigid vinyl construction
- Easy 30-minute installation
- Eliminate filter gaps, sags, and tears
- Economical option for dual-filtration systems
- Allows spray booth operators to quickly and economically retrofit a wide variety of booth designs, including cross-draft and water-wash filter systems

AFT GRIDS AND HOLDING FRAMES

AFT's line of long lasting galvanized steel frames and grids facilitate fast and easy installation of paint arrestors for single and multistage paint arrestor systems.

Sizes range from 20" x 20" &

20" x 25" to 36" x 24" and will accommodate a wide range of filter media including fiberglass, paper, polyester and Andrae® (accordion-style). All grids come with replaceable heavy duty rubber tips to ensure secure grid placement.
